To Whom It May Concern

I am pleased to recommend Antonio José Romero Barrera for his outstanding contributions as a Technical Researcher on the European project Fostering Artificial Intelligence at Schools (FAIaS), coordinated by the Universidad Rey Juan Carlos. During his time on the project, Antonio proved to be an invaluable asset to the team, playing a pivotal role in the success of our research and development activities in artificial intelligence applied to the education sector.

Antonio joined our team in November 2021 and excelled in his role as a Technical Researcher until the project's completion in August 2023. His technical skills in the field of artificial intelligence were a valuable asset to the project. He worked closely with our international partners, including the Vrije Universiteit Brussels (Belgium), CollectiveUP (Belgium), and Theatro Circo de Braga (Portugal), which contributed significantly to the effective management and coordination of the project.

Throughout his time at FAIaS, Antonio demonstrated an exceptional ability to tackle complex challenges and propose innovative solutions. He stood out for his ability to analyze data and develop advanced algorithms, which had a direct impact on the progress of our research and the achievement of our objectives.

In addition to his technical skills, Antonio also demonstrated an exceptional commitment to teamwork. From the beginning, he easily integrated into our international group of researchers and collaborators and was always willing to share knowledge and provide support when needed. He has great skill in making presentations (as for instance the one on the MIT Moral Machine in the Multiplier Event held in Braga, Portugal), creating web platforms, developing resources, and managing courses for teachers. He is a highly reliable, qualified, organized, and results-oriented person. His ability to manage multiple tasks and projects simultaneously was critical to the

success of FAIaS.

In short, it is an honor for me to recommend Antonio without reservation. His contribution to the European FAIaS project was exceptional, and I have no doubt that he will continue to excel in whatever project or position he chooses to undertake in the future.

If you need additional information or have any questions, please do not hesitate to contact me.

Sincerely,

Prof. Dr. Gregorio Robles
Full Professor at URJC
